CHAMBER OF COMMERCE.

PRESIDENT THOMPSON'S WISE AND PRACTICAL SUGGES-TIONS.

The Full Text of His Address to the Chamber Upon Retiring From Its Presidency.

Tuesday night at the Chamber of Commerce and Industry's annual meeting and election of officers, Mayor Thompson retiring from its presidency, submitted a report of the past year's work, embracing many wise suggestions for its future consideration, and the grounds upon which he based them. The paper is a splendid document, ably setting forth the many public improvements recently completed and the bright possibilities of Raleigh's future.

Mr. President Thompson said: GENTLEMEN OF THE CHAMBER OF COM-MERCE AND INDUSTRY:

This report of the second year's work of the Chamber of Commerce and Industry is not nearly so satisfactory as the one submitted by your first president, for two reasons: First, the cotton crop of 1889 was the poorest raised in this section since 1867. Second, the work projected had apparently consumed all the energy and money available.

During the year the following amounts have been expended in permanent im-

provements of a public nature: Sewerage system, 22 miles\$	75,000
Street paving 14 blocks	25,000
Cotton mill complete	125,000
Addition to N. C. wagen factory.	15,000
Tannery	5,000
Ice factory	20,000
ACC Attended 3	5,000
Improvement to township roads	11,000
Improvement to township roads Addition to A. & M. A. College	7,500
Addition to A. & M. A. College.	7,500
Improvement to township roads Addition to A. & M. A. College Total	7,500 277,500

jected for 1890-'91: New Union depot to cost......\$ 75,000 State Baptist University...... 50,000

Tobacco factory...... 25,000 Total \$ 150,000

The present indications for 1890, are that we will harvest the finest crop of cotton, corn and tobacco ever gathered in the county of Wake, which can probably be disposed of at good prices I think it no exageration to predict that the money value of the cotton crop in Wake county alone, will exceed that of last year by more than \$800,000. The enterprises inaugurated by this chamber have been carried to a successful completion, and everything seems to point to the most prosperous period known in the history of our city. We must shake off any feeling of lethargy and combine all our energies and determine to avail ourselves of the rich opportunity now presented. It is not at all unreasonable to accom-

plish within the next two years the following:

1st. Belt line of railroad, three miles at a cost of \$30,000. This could be accomplished by railroads and property owners co-operating, and valuable manufacturing sites would be available, a very necessary end to be obtained.

2. Land and Improvement Company to open up large tracts of land to small purchasers, a capital of \$50,000 would guarantee success.

3. Knitting mill to cost \$25,000 would give more employment in proportion to the capital invested than any other enterprise, and would certainly earn satis factory dividends.

4. Add an extension to the southern wing of the Yarboro at a cost of \$25, 000. If constructed on modern plans, and the other portion remodeled would give ample hotel facilities and pay owner and proprietor handsomely.

5. Offer sufficient inducements to the Georgia, Carolina and Northern railroad company to locate its shops at Raleigh. These shops would cost in the neighborhood of \$100,000. The Raleigh & Gaston railroad company now spend annually here \$150,000. This could be more than doubled if the Georgia, Carolina and Northern had its shops in Raleigh.

6. A well-equipped gas works at a all kinds of labor-saving appliances, various small industries would spring hive of industry.

7. A combination building for holding in the spring our horse and cattle show and in summer our fruit fairs would cost \$5,000. Well-directed and systematic work would accomplish this result, and with cheap railroad rates a large crowd would visit Raleigh in the dull months of May and August, thus greatly benefitting our merchants, but the greatest benefit would accrue to the farmers and land-owners. If what we HAVE DONE and can do in producing fine horses, fine cattle and choice grapes could be properly presented to the world, lands now unthe past four years.

9th. A little encouragement from our people, and careful management on the part of your railroad committee would secure the extension of the Albemarl and Raleigh railroad to Raleigh. The freight and passenger depots; side-tracks, of \$50,000. The superintendent of this railroad has already offered to take a fourth interest in the union passenger depot to cost \$100,000, but the conditions of his being allowed to do so were such that he could not accept.

limits to the Federal Cemetery to cost not less than \$25,000. The custom of the government has been to connect all of these cemeteries with the city near which they are located, by constructing a desirable roadway, and this will be done if properly preseted to the Con-

gress now in session. crops this year, with the high prices of public outery for cash. past seasons well sustained, and as we ry to the farmer. If we are ever to un- Settle your accounts before the sale. dertake another Exposition, this is the 3t

year to do it, and as the eyes of the capitalists North are looking this way as never before, we should by all means avail ourselves of the opportunity to bring our State prominently to the attention of the world. The investment required for this would be \$25,000while the probable result would far ex-

ceed any calculation that could be made. Some one may say, what have we to encourage all these enterprises herein suggested? We have a township with a total value of real and personal property of not less than \$10,000,000; we have ample school facilities, maintained at the public expense, to give all of our children a good common school education; colleges for both white and colored; twenty-one churches; three banks; ments in all county roads.

In addition to these advantages afforded by the city, Wake county is the corn than Hyde, as fine bright tobacco pected. as Granville, Person or Caswell, and the choicest grapes of endless varity found this side of California. No better horses or cattle can be produced, either in Kentucky, New York or Vermont. The soil is fertile, and responds promptly to any application made to improve it, and produces all the grasses, and nearly all the cereals grown in any of the Atlantic States.

With all of this wealth and all of these advantages, with a law-abiding population, within easy reach of all the markets of the country, with improved lands at reasonable prices, what is to prevent the consumation of all that I have briefly outlined, and if it can be done, we must do it; and if it is accomplished the this city yesterday morning well loaded coming decade will be one of such wonderful progress as to exceed the hopes of the most sanguine of our enterprising | the rout. It arrived safely in Richmond.
